

Create a Poster Size Core Board

Use the following pages to create a poster size low tech board. This might make for easier laminating since you will be using 8.5 X 11 paper to create. The final organization would look like this:

friend	boy	girl	mother	father	brother	sister	head	hand	foot	feet
I	me	what	where	now	later	today	same	diffrent	big	little
my/mine	is / am are	to	first	next	last	all gone	ready	busy	happy	sad
it	can	have	come	feel	know	give	angry-mad	messy	good	bad
you	do	eat	drink	finish	get	sing	that	a	and	more
your	don't-not	go	help	open	put	see	again	in	away	on
here	there	like	play	read	stop	walk	show	out	up	off
yes	no	want	take	tell	turn	watch	write	front	down	with

Here are some ideas for use:

- You can decide to put all the words up or only the ones you are working on and add as you go. This classroom played a fly swatter game with the words.

- This example shows it taped to the floor and the students could play games or step on the words.

- Be creative. Use the individual words to model at table activities, point to them if they are up on the board, introduce the new word and add it to the wall.
- Use these individual buttons as pull-offs to a full wall chart.
