**Choose Core Words/Phrases to Target:**

--	--	--

**Aided Language Input: (what will you say and touch on the AAC system)**

Core Word/Phrase	Script for Aided Language Input

**REMEMBER:**

- Keep your model at or just about their language stage, so if they are saying/touching 1-2 words then you model 2-4 words.
- Use open ended questions, and model possible responses.
- Give them plenty of wait time, 10-20 seconds.
